Commentary on Minorities in Anthropology: 1994-1997

by

The Editors

We wish to convey certain information drawn from the American Anthropological Association (AAA) and the National Research Council concerning minorities in anthropology. We are indebted for help from Professor Michelle Sauther of the University of Colorado Anthropology Department and David B. Givens and Timothy Jablonksi of the AAA Department of Academic Relations. The following demographic information on minorities in anthropology is derived from the 1995 Survey of Anthropology Ph.D.s, the 1996 AAA Survey of Anthropology Departments, and the 1997 AAA Survey of Anthropology Ph.D.s.

I. 1995 AAA Survey of Anthropology Ph.D.s: Ethnic Minorities
   A. Faculty
      No data given
   
   B. Ph.D.s
      For Academic Year (AY), 1994-1995 AAA determined that most minority Ph.D.s were in cultural anthropology. Representation in the subfields are as follows:

      archaeology – 0% socio-cultural – 74%
      biological/physical – 4% linguistic anthropology – 4%
      applied/other – 17%.

      Minority representation in anthropology-Ph.D. cohorts increased from 13% in 1990 to 16% in 1995, and the percentages of white anthropology Ph.D.s decreased from 96% in 1972 to 84% in 1995. Comparative figures of all U.S. Ph.D.s earned by ethnic minorities (including anthropology) are as follows:

      American Indian – 0% Asian – 5%
      Black – 4% Hispanic – 3%
      White – 87%

   C. Students
      In AY 1994-1995, US Department of Education figures for undergraduate and graduate US college enrollments (combined) were:

      American Indian – 1% Asian – 6%
      Black – 10% Hispanic – 8%
      White – 75%

      (Data source: 1995 Survey of Anthropology Ph.D.s, U.S. Dept. of Education as reported in the Chronicle of Higher Education Almanac, Sept. 1, 1994, p. 31.)

II. 1996 AAA Survey of Departments: Ethnic Minorities

   A. Faculty
      The typical academic anthropologist in 1996 is a white male, full professor, nearing retirement, whose principal subfield is socio-cultural anthropology. In Academic Year (AY) 1995-1996, minority professors made up 11% of the full-time anthropology faculty in the US. This is a small increase over the 10% reported in the 1994 Survey of Departments. American Indian anthropologists lost one percentage point, while Asian/Pacific Islanders gained a point.

   B. Ph.D.s
      Minority representation in anthropology-Ph.D. cohorts increased from 13% in 1990 to 16% in 1995, according to the AAA’s 1995 Survey of Anthropology Ph.Ds. Meanwhile, the percentages of white anthropology Ph.D.s decreased from 96% in 1972 to 84% in 1995. (Comparative figures for all U.S. Ph.D. degrees conferred, by racial and ethnic group, in 1995, are as follows:

      race unknown – 1.1% American Indian – 0.5%
      Asian – 4.1% Black – 4.7%
      Hispanic – 3.3% White – 86.3%

   C. Students
      In 1995-1996, undergraduate minority students made up 9.1% of declared anthropology majors in the U.S.
III. 1997 AAA Survey of Anthropology Ph.Ds: Ethnic Minorities

A. Faculty
No observable change.

B. Ph.Ds.
Minority representation in anthropology-Ph.D. cohorts dropped from 16% in 1995 to 15% in 1997. Meanwhile, the percentage of white anthropology Ph.Ds. increased from 84% in 1995 to 85% in 1997. Most minority Ph.Ds. still remain in cultural anthropology. Representation in the subfields, compiled for the 1996-1997 Ph.D. cohort, was as follows:

- archaeology – 16%
- socio-cultural – 71%
- biological/physical – 6%
- linguistic anthropology – 0%
- applied/other – 6%

(Note: based on small number, these percentages are volatile and imprecise. Data source: 1997 AAA Survey of Anthropology Ph.Ds.)

C. Students
No data given.

IV. Conclusions
During the 1990s anthropology, especially undergraduate anthropology, enrollment and degrees awarded increased. According to survey information, of the 15,920 students majoring in anthropology in 1998 10% were ethnic minorities. Minorities made up approximately 11% of anthropology faculty, a number virtually unchanged since 1988. Increases did occur among lower professorial ranks. Among those with 5 years or less experience, 16% are minorities; 5-15 years experience compare with 11% minorities; and for those reporting 15-25 years, 6.5% are minorities.

V. Questions for discussion/comments
A. Why are so few minorities in anthropology?
B. Why are minorities primarily in Cultural Anthropology and not in Archaeology or Biological Anthropology?
C. How can we increase the participation of minority anthropologists in Applied Anthropology in the High Plains?

High Plains Applied Anthropologist

The High Plains Applied Anthropologist is now inviting manuscript submissions for the Fall 2002 and Spring 2003 issues.

The High Plains Applied Anthropologist, the premier journal of the High Plains Society for Applied Anthropology, addresses issues of cultural change, adaptation to the modern world, and the diverse ways in which humans approach, analyze, and solve problems of cultural change.

The HPAA, now in its 22nd year of continuous publication, is a refereed journal publishing papers in all areas of applied anthropology and from all regions of the globe. Papers by students and practicing anthropologists are especially welcome. Commentaries, announcements, articles, and special issues with guest editors will be favorably considered.

Please submit manuscripts to:
Editor, P.O. Box 4147, Boulder, CO 80306-4147
or
walkerde@spot.colorado.edu

When submitting articles by mail, please send disposable copies (not originals) on 8½ by 11” paper, double-spaced, single-sided, with your name, address, article title, abstract, and any footnotes and references used included, as well as a copy of the article on a 3½” floppy disc or CD formatted for CD-Rom reading. Only articles in Microsoft Word and Word Perfect word-processing programs are accepted at this time.

Further information on manuscript submissions may be obtained from the HPSfAA Newsletter, from copies of HPAA, and from our website at: www.hpsfaa.org

Conference Theme
"Indigenous People and a New Century."

A Special Welcome to our New Members and especially those who joined us at the Estes Park conference!

The wonderful world of Applied Anthropology awaits you!

This year’s conference was held on April 19-21, 2002. The conference co-chairs did an excellent job in lining up speakers, programs, and panel discussions.

One of the most well-received programs was presented by the students in Deward Walker’s Applied Anthropology class from the University of Colorado, Boulder. The students presented papers on a diverse range of topics such as “Current Issues in Primatology” and “How Accurate is the Media We Receive.” “The Elusive Diploma: Causes and Solutions to the Problem of Low Graduation Rates for Native American Students at the University of Colorado” was presented by Elizabeth Paris, one of our newest members.

We were fortunate in having Dr. Harald E.L. Prins, Professor of Anthropology, Kansas State University, as our Guest Speaker. Dr. Prins is the author of The Mi'kmaq: Resistance, Accommodation and Cultural Survival, and co-producer of Our Lives in Our Hands, a documentary film on Mi'kmaq basketmakers. Born and raised in the Netherlands, Dr. Prins was academically trained in prehistoric archaeology, social anthropology, and comparative history at various universities in the Netherlands and the United States. He doctored is from the University of Nijmegen (1976) and his PhD is from the New School for Social Research (1988). He has done extensive fieldwork among indigenous peoples in South and North America and typically teaches classes on American Indians (North/South), Anthropological Theory, Ethnohistory, Visual Anthropology, Native Rights, and Introduction to Anthropology.

Retreat Theme DRAFT
“Personal and Professional Transitions”

It’s not too soon to start planning for the 2003 HPSfAA Annual Meeting, April 4-6, 2003!

Eliot and Stacye are seeking a student, either undergraduate or graduate student, to help plan the 2003 conference. This is a great opportunity to get involved with the HPSfAA to ensure that there is appropriate representation of student themes and issues at the conference! The responsibilities of the student co-chair include: help with planning sessions (ensure that the conference program encompasses student perspectives and issues); help with logistics (including preparing handouts, advertisements, etc.); help with setting up sessions at the conference; recruit other students to participate at the conference.

This is a great opportunity for students to get involved with the HPSfAA in a very visible capacity.

If you are interested in being a student co-chair for the conference, please contact me, Eliot Lee, at: eliot@anthrotech.com or Stacye Jones at: Stacyeaj@aol.com

Don’t wait until the last minute! Get your paper and panel proposals in now! Contact Eliot Lee at: eliot@anthrotech.com Contact Stacye Jones at: Stacyeaj@aol.com

Alaska Court Strikes Down English-Only Law

After 3 years of litigations, Judge Fred Torrisi of the Superior Court, State of Alaska, ruled in Alayak v. State that the English Only initiative, passed by voters in 1998, violates Article 1, Section 5 of the Alaska Constitution and is unconstitutional. NARF filed the case in February 1999 on behalf of 27 individual plaintiffs. Judge Torrisi granted a preliminary injunction on March 3, 1999 enjoining the state from enforcing the initiative as it kept many Alaska Native villagers and community governments from exercising their right to government since many of them do not speak English. The Alaska initiative would have prohibited any language except English in all governmental functions and actions. It is not known if the state will appeal.

New Documentary on Immigrants’ Rights

The American Friends Service Committee (AFSC) has released Echando Raices/Taking Root: Immigrant and Refugee Communities in California, Texas, and Iowa. Stories and perspectives from immigrants, scholars, union and community activists, local officials, displaced workers, and more intermix scenes of community life around a vibrant musical score. Echando Raices/Taking Root is available in English and Spanish and includes a discussion guide with background on immigration issues. For more information or a downloadable order form, please visit our website at: www.takingroot.org. Additional questions may be directed to cruweb@afsc.org.

Al-Andalus: Traditional and Contemporary Andalusian Music

Al-Andalus is a group of 2-9 musicians, singers, and dancers from North American, North African, Arabic, Indian, Hispanic, Persian, Sephardic, and Spanish communities who perform works inspired by Andalusian traditions with native artists as well as new compositions uniting their Andalusian legacy with jazz, progressive pop, and Asian and African music. Concerts are richly layered, socially conscious journeys uniting sound and movement, poetry and fine arts, and East and West in a colorful melange shadowed by the dark beauty and rhythmic surges of Spain's traditional Flamenco music. Program Offerings include: Andalusian Legacies (2-7 performers); Music of The East (Lecture/ Demonstration); Rhythm and Spirit (Workshop/ Lecture/Demonstration); Andalusian Women’s Ensembles (academic paper presentation w/video); Workshops For Children and Young Adults From Baghdad to Granada. Visit the website at: www.andalus.com for samples of their music and to purchase their CDs.

Native Groups Criticize University of Minnesota's Wild Rice Genome Research

PRESS RELEASE RECEIVED MAY 20, 2002

Wild rice, a staple for many Minnesotans and a sacred food for tribal communities, could be threatened by research conducted at the University of Minnesota, assert tribal leaders.

The tribal community has repeatedly contacted UMN and its President, Mark Yudof, to discuss the implications and details of the university's wild rice research. UMN has refused to engage in a dialogue or adequately address issues raised by the tribal communities.

In the last several months, several Tribal governments in Minnesota and Wisconsin have passed resolutions objecting to the research being done at the University of Minnesota. Among the concerns is that the genetically engineered wild rice might contaminate traditional wild rice and that private companies might file additional patents on wild rice, restricting its use by tribal communities.

Writes Winona LaDuke (Ojibwe), who spoke at the press conference, "... for those still involved, locally processed, lake-harvested Native rice is about doing right and community pride, and embodies the essence of being Anishinaabe."

Genetically Engineered Fish Escape

In June 2000 the Council for Responsible Genetics warned of dangers of genetically engineered fish escaping into the environment and placing natural stocks of fish in jeopardy ("Fishy Engineering," Kimberly Wilson, GeneWatch Vol. 13 No. 3). Scoffed at by the biotech fish industry, this prediction is now being tested. Reports from Scotland indicate that on March 29, 2002 as many as 10,000 genetically engineered salmon escaped from pens, putting wild salmon at risk of gene dilution, inability to compete for food, and possible introduction of new diseases.
